

Net Zero for All, Starting Today

EcoWorks Services

Item	Cost	Description
Net zero strategy consulting	\$80/hour	EcoWorks can support your organization with technical advice on how to achieve net zero carbon emissions on the timeline you specify. Cost estimates and financial payback periods included.
Benchmarking training	\$500/workshop	Staff can participate in this hands-on, 2-hour session to learn how to benchmark your buildings in US EPA Portfolio Manager, create simple reports, and monitor building performance long-term
Rate adjustment training	\$675/workshop	EcoWorks will provide a 2-hour session on how to read utility bills, understand DTE rate structures, and how to determine if your facility is on an optimal rate structure
Resident energy smart education program	\$500/workshop	EcoWorks will provide a 2-hour session for tenants of your building to learn no and low-cost strategies to save energy. Energy savings kits can be provided at an added cost of \$45/participant. Max. size: 25 participants
Resident water smart education program	\$500/workshop	EcoWorks will provide a 2-hour session for tenants of your building to learn no and low-cost strategies to conserve water. Water savings kits can be provided at an added cost of \$30/participant. Max. size: 25 participants
Billing error identification	50% of reimbursement	EcoWorks will identify errors in utility billing associated with your building. There is no upfront charge for this service but 50% of any reimbursements from the utility company must be paid to EcoWorks upon receipt
Basics of energy management	\$675/workshop	EcoWorks will provide a 2-hour session on the basics of energy management for large facilities including advice on project evaluation, facility assessments, capital improvement planning, and project financing. EcoWorks-based part-time and full-time energy managers are available as well at competitive rates
Energy efficiency consulting	\$80/hour	EcoWorks can provide energy management planning, project financing advice, facility assessments/audits, project evaluation, owner's representation, contract review, RFP development, stakeholder engagement, benchmarking services, and/or project management to interested clients

EcoWorks creates opportunities to learn and practice the sustainable use of energy and natural resources through innovative education, job training, consulting, social business and advocacy. Founded in Detroit in 1981, EcoWorks is a 501(c)3 nonprofit organization with a strong record of providing sustainability solutions for community and economic development. While EcoWorks' roots are firmly planted in energy conservation we have grown to emphasize all aspects of sustainable development as it relates to the buildings in which people work, live, and play. <http://ecoworksdetroit.org>
